WHEELS.*

COLLECTION 2025/2026

DESIGN THAT MOVES. PASSION THAT DRIVES.

For over 50 years, RONAL has stood for pioneering technology, uncompromising quality, and distinctive design in the world of alloy wheels. Today, we redefine ourselves as a premium brand for high-end wheels – merging cutting-edge engineering with bold emotions and striking aesthetics.

Every RONAL wheel is born from true passion and crafted with precision. Designed by enthusiasts, created with an eye for detail, built for those who demand more.

RONAL. Driving Emotion. Since 1969.

VISIONARY DEVELOPMENT. PRECISION ENGINEERING.

At RONAL, every wheel begins with an idea – and becomes reality through world-class engineering, advanced manufacturing, and strict quality standards. From motorsport-inspired aerodynamics to intelligent lightweight design, we combine innovation with function to set new standards on the road.

Our Skills

- Lightweight Engineering & Aerodynamics
- Advanced CAD & FEM Simulation
- State-of-the-Art Manufacturing
- High-End Surface Technologie
- OEM Compatibility & TÜV Certification

Our Passion

- 50+ Years of Automotive Spirit
- Motorsport in our DNA
- Designed to Inspire
- Driven by Innovation
- Performance with Soul
- Created by Enthusiasts – for Enthusiasts
- Statements, Not Just Wheels

PERFORMANCE

Performance for speed and more power

Stunning design and quality high-end construction not only provide an eye-catching look, but also improved performance and driving stability. From sporty turns to speed records, you'll love our Performance-Line.

WHEEL TECHNOLOGIES BY RONAL.

RONAL applies advanced wheel technologies to optimize strength, weight, and design precision. Each process enhances performance, efficiency, and aesthetics—delivering technical advantages for modern vehicle requirements.

FORGING

Forged wheels offer maximum strength and minimal weight, even in large diameters – ideal for high-performance vehicles.

They feature superior surface quality, precision design, and help reduce fuel consumption due to lower rotating mass.

UNDERCUT

Unnecessary material behind the spokes is removed without affecting wheel strength – reducing weight by up to 1.4 kg.

This efficient method, done by machining or flowforming, enhances performance and efficiency.

DIAMOND CUT

Diamond cutting creates glossy, mirror-like finishes with striking two-tone effects.

The precise removal of paint and aluminum reveals a high-contrast, premium look – especially on flanges and spokes.

PAD PRINTING

Diamond cutting creates glossy, mirror-like finishes with striking two-tone effects.

The precise removal of paint and aluminum reveals a high-contrast, premium look – especially on flanges and spokes.

COLOR TINTED

A colored clearcoat adds brilliant, metallic glazing effects to polished wheel surfaces.

The result is a deep, shimmering finish that is both eye-catching and winterproof.

DESIGN ELEMENTS

Interchangeable design elements in various colors and shapes let users personalize their wheels easily.

From matte to chrome, glued to screwed – these add-ons offer style flexibility and detailed design options.

MULTI COLOR RIM (MCR)

MCR offers multicolor product variations. The innovative process is carried out without masking, taping, or covering on rotationally symmetrical surfaces.

CENTERLOCK

Optionally expandable to RONAL Centerlock applications.

With a simple click, the "Centerlock nut" is ready for use and ensures a striking look and high-performance style.
